

Declaration of Conflicts of Interest

REVIEW TITLE: Digital Interventions for Distraction during Painful Procedures Among Children

CONDUCTED BY: St. Michael's Hospital (Knowledge Synthesis Team)

DATE: October 11, 2017

Full Name	Related Declarations	Other Declarations
Anna Taddio	Research Funding Investigator initiated funding for a research project from Pfizer for an immunization pain study in infants. Study supplies (placebo and active drugs) were donated by Ferndale and Natus. The study included parent education/intervention, sucrose analgesia and topical anesthetics. These are all interventions relevant to procedural pain management in children; none are related to the research question covered by the review.	N/A
Bonnie Stevens	Intellectual/Research Funding I am currently funded through CIHR for a Foundation Grant that evaluates the effectiveness of a multidimensional KT resource for improving pain assessment and management processes in infants and the impact on clinical outcomes. Up to 40 NICUs across Canada and internationally will be involved in the pilot and RCT phases of this research. I am also a Co-PI on a CIHR funded Chronic Pain Network through the SPOR funding initiative which will foster research on chronic pain in Canada through many initiatives including RCTs.	N/A
