

PRISMA-ScR

ITEM 13: SYNTHESIS OF RESULTS

Describe the methods of handling and summarizing the data that were charted.

Title	1	Title
Abstract	2	Structured summary
Introduction	3	Rationale
	4	Objectives
Methods	5	Protocol and registration
	6	Eligibility criteria
	7	Information sources
	8	Search
	9	Selection of sources of evidence
	10	Data charting process
	11	Data items
	12	Critical appraisal of individual sources of evidence
	13	Synthesis of results
Results	14	Selection of sources of evidence
	15	Characteristics of sources evidence
	16	Critical appraisal within sources of evidence
	17	Results of individual sources of evidence
	18	Synthesis of results
Discussion	19	Summary of evidence
	20	Limitations
	21	Conclusions
Funding	22	Funding

Tips for reporting this item:

- Describe the plan for synthesizing the range of evidence included to answer research questions and objectives
- Detail how evidence will be presented which may be in a narrative format, table, or visual representation, including a map or diagram

Example:

"We grouped the studies by the types of behavior they analyzed, and summarized the type of settings, populations and study designs for each group, along with the measures used and broad findings. Where we identified a systematic review, we counted the number of studies included in the review that potentially met our inclusion criteria and noted how many studies had been missed by our search."
