

Practicing Knowledge Translation (PKT)

A professional development course that has been delivered to over 300 participants globally (including Australia, Ethiopia, Ireland, Uganda, and Zambia) since 2015.

What is Knowledge Translation (KT)?

Knowledge Translation (KT) is a process that bridges research, evidence, and practice to strengthen health systems and improve health outcomes. At the KT Program, our approach to KT is rooted in theory and science, but our application of KT is uniquely pragmatic and focused on real-world impact.

What is PKT?

PKT is a professional development course on how to apply KT science to real-world implementation projects to enhance and sustain project outcomes.

Participants will learn to:

- Map barriers & facilitators to change using theories and frameworks
- Systematically select and operationalize implementation strategies
- Plan for implementation, evaluation and sustainability

Who should consider taking PKT?

- PKT is geared towards individuals in any health-related discipline who are responsible for implementing change.
- Previous participants have come from a range of organizations and roles

April 2020 Course Schedule

March 23	Access to online course resources
April 14 - 17	4 day in-person workshop in Toronto, Canada

Cost

\$2,850.00 CAD per person. (*The cost does not include travel to or accommodation in Toronto.*)

Scholarship Opportunity

We will be offering an opportunity for applicants coming from low- and middle-income countries or Indigenous communities to apply for a scholarship. For more information, visit the [application form](#).
